STAIRS MODULAR

SIXTY82™

## WHY: STAIRS MODULAR   351018

- A single step unit, one-size fits all
- Bolted together to create stair height up to 140 cm
- Ideal for transport: optimised packaging volume due to flat-pack-design
- Anti-slip Steps
- Loading 500 kg/m^2
- Protected front edge of steps
- Integrated handrail connection

Every element of modular stairs has a total height of 40cm, when mounted properly the height of the stairs will increase with steps of 20cm. **The formula to calculate the amount of elements needed is: height of stage in cm / 20 = ... – 1**
Only to be assembled with railing.

Stage of 100 cm = 4 steps
